Claims Allowed

Claims 6-10 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not anticipate nor render obvious the invention of a control system for a hybrid vehicle drive including a rotary electric unit and a transmission wherein a starting clutch provides a first torque transmitting route between an engine and an input shaft, a plurality of gear trains and associated dog clutches in the transmission between the input shaft and an output shaft, a second clutch provided on the gear trains for adjusting a transmitting torque according to a pressing force therein, the electric unit to enable torque to be transmitted to the input shaft, wherein with the vehicle stopped, the dog clutches in a neutral condition and the starting clutch engaged, engine torque is transmitted to the electric unit to generate power, and with the vehicle in a start mode, the second clutch is controlled to transmit at least one torque from the engine or the electric unit to the output shaft and a rotation synchronization is carried out and the vehicle is started by engaging a dog clutch.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art Discussed

The examiner has considered the references cited by the applicant in his Information Disclosure Statement filed July 22, 2003. None of the references show all of the features of the claimed invention.

Art Unit: 3681

The reference cited by the examiner is deemed pertinent to applicant's disclosure.

Mikami '533 shows a hybrid vehicle drive wherein a transmission is provided with both dog clutches 40, 42 and friction clutches 36, 38, as well as a starting clutch 16, a motor/generator 12 and an engine 10, but does not show a mode of operation wherein when the vehicle is stationary, the dog clutches are in the neutral condition, the starting clutch is engaged, the engine is running and the motor/generator is in a charging condition.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dirk Wright whose telephone number is 703-308-2160. The examiner can normally be reached on Monday through Friday, 8AM-4:30PM.
